

Affidavit of Shin Hoshikawa

Petition to Revive U.S. Patent App. No 09/574,738 under 37 CFR 1.137(a)

I, Shin Hoshikawa, hereby state and declare as follows:

1. I am employed as an assistant to Robert Cumbow of the law firm Graham & Dunn, P.C. I am authorized to testify as to the information set forth in this Affidavit, including all facts relating specifically to a purchase of assets from uRoam, Inc. ('uRoam'), by F5 Networks, Inc. ('F5'), on or about July 23, 2003. I make the following statements based upon my personal knowledge.
2. On or before July 23, 2003, Graham & Dunn, P.C., was retained by F5 to handle an agreement for the purchase of assets from uRoam. At the time this matter was conducted, I had been employed as a legal assistant for a total of eleven years, with over four of those years being at the firm of Graham & Dunn, P.C. At this time, I had been working for four years and three months as an assistant to Robert Cumbow, an attorney with Graham & Dunn, P.C.
3. On or before July 23, 2003, I received material(s) relating to the purchase of assets from uRoam by F5. These material(s), a copy of which is attached as Exhibit A, indicated that the assets to be acquired from uRoam by F5 included U.S. Patent Application No. 09/574,738, entitled "Method and Apparatus for Accessing a Computer Behind a Firewall". As seen in the attached exhibit, the status of this U.S. Patent Application was indicated as pending.
4. On or before July 23, 2003, there was a business routine employed at Graham & Dunn, P.C., for handling intellectual property assets involved in an asset purchase agreement. Subject intellectual property assets included filed, non-issued patent applications. The business routine comprised the clerical functions of receiving material(s) relating to the intellectual property assets, drafting an Assignment of Patents document, transcribing details of the intellectual property assets from the received materials into the Assignment of Patents document, and providing the Assignment of Patents document to counsel for review and use in conducting the asset purchase agreement.
5. On or before July 23, 2003, I employed the established business routine with regard to the material(s) received for the purchase of assets from uRoam by F5. As shown in Exhibit B, application of this business routine to the material(s) referring to U.S. Patent Application No. 09/574,738, however, resulted in the improper entry of the application number into an exhibit table that accompanied the Assignment of Patents document. A copy of this document, the Assignment of Patents, was signed on July 23, 2003. As shown in the exhibit, this error consisted of transposing numbers in the application number, resulting in an incorrect application number listed as 09/547,738, instead of the correct application number 09/574,738, in the exhibits table for the Assignment of Patents document.

Affidavit of Shin Hoshikawa

Petition to Revive U.S. Patent App. No 09/574,738 under 37 CFR 1.137(a)

6. On or before July 23, 2003, I was sufficiently trained and experienced in performing the clerical functions involved with the established business routine, so as to warrant the trust and reliance of others upon my ability to perform these functions in a manner that avoided errors in its performance. For example, I do not recall making such an error in eleven years prior, which included recordation of asset transfers involving numerous patents, patent applications, trademark applications and registrations, and copyright registrations.
7. This data entry error in the performance of the established business routine was entirely accidental. I made this error despite exercising the care and diligence that a prudent and careful person would observe in carrying out his or her most important business.
8. My error in performing this business routine was the sole cause of the repeated appearance of the incorrect application number in other documents subsequently involved with the handling of this matter, including in a Record of Assignment, signed September 22, 2003, a copy of which is attached hereto as Exhibit C. Using the information recorded in the exhibit table of the Assignment of Patent document, Exhibit B, I personally prepared these documents under the direction of Robert Cumbow.
9. Copies of the Assignment of Patents document and the Record of Assignment document, Exhibits B and C, were filed with the USPTO on or about September 23, 2003. I was personally involved with the submission of these documents to the USPTO. Because of my error in the initial recording of application numbers, however, this Record of Assignment was not directed toward the correct application number 09/574,738.

I make these statements under penalty of perjury and hereby swear that the foregoing is true and correct to the best of my recollection.
